

PROTOCOL:, Bruce.,PERTINENT MEDICATION: ,  
None.,REASON FOR TEST:, Chest pain.,PROCEDURE AND  
INTERPRETATION: ,1. Baseline heart rate: 67.,2. Baseline  
blood pressure: 150/86.,3. Total time: 6 minute 51 seconds.,4.  
METs: 10.1.,5. Peak heart rate: 140.,6. Percent of  
maximum-predicted heart rate: 90.,7. Peak blood pressure:  
200/92.,8. Reason test terminated: Shortness of breath and  
fatigue.,9. Estimated aerobic capacity: Average.,10. Heart  
rate response: Normal.,11. Blood pressure response:  
Hypertensive.,12. ST segment response: Normal.,13. Chest  
pain: None.,14. Symptoms: None.,15. Arrhythmia:  
None.,CONCLUSION:,1. Average aerobic capacity.,2. Normal  
heart rate and blood pressure response to exercise.,3. No  
symptomatic electrocardiographic evidence of  
ischemia.,CONDITION: , Stable with normal vital  
signs.,DISPOSITION: ,The patient was discharged home and  
was asymptomatic.,
