

EXAM: , Ultrasound carotid, bilateral.,REASON FOR  
EXAMINATION: , Pain.,COMPARISON:, None.,FINDINGS: ,  
Bilateral common carotid arteries/branches demonstrate  
minimal, predominantly noncalcified plaquing with mild calcific  
plaquing in the left internal carotid artery. There are no  
different colors or spectral Doppler waveform  
abnormalities.,PARAMETRIC DATA:, Right CCA PSV 0.72  
m/s. Right ICA PSV is 0.595 m/s. Right ICA EDV 0.188 m/s.  
Right vertebral 0.517 m/s. Right IC/CC is 0.826. Left CCA  
PSV 0.571 m/s, left ICA PSV 0.598 m/s. Left ICA EDV 0.192  
m/s. Left vertebral 0.551 m/s. Left IC/CC is  
1.047.,IMPRESSION:,1. No evidence for clinically significant  
stenosis.,2. Minimal, predominantly soft plaquing.,
