

HISTORY OF PRESENT ILLNESS:, A 49-year-old female with history of atopic dermatitis comes to the clinic with complaint of left otalgia and headache. Symptoms started approximately three weeks ago and she was having difficulty hearing, although that has greatly improved. She is having some left-sided sinus pressure and actually went to the dentist because her teeth were hurting; however, the teeth were okay. She continues to have some left-sided jaw pain. Denies any headache, fever, cough, or sore throat. She had used Cutivate cream in the past for the atopic dermatitis with good results and is needing a refill of that. She has also had problems with sinusitis in the past and chronic left-sided headache.,FAMILY HISTORY:, Reviewed and unchanged.,ALLERGIES: , To cephalexin.,CURRENT MEDICATIONS:, Ibuprofen.,SOCIAL HISTORY:, She is a nonsmoker.,REVIEW OF SYSTEMS:, As above.
